Description: PMBOK Stakeholder Engagement Plan

Stakeholder Engagement Plan

Project: ADPA - Advanced Document Processing & Automation Framework

Version: 3.2.0

Date: July 2025

Author: Project Management Office (PMO)

1. Purpose

The purpose of this Stakeholder Engagement Plan is to define the strategy, activities, and tools for identifying, engaging, and managing stakeholders throughout the lifecycle of the ADPA (Advanced Document Processing & Automation Framework) project. ADPA is a modular, enterprise-grade framework designed for AI-powered document generation, project management, and

business analysis, supporting major industry standards (BABOK v3, PMBOK 7th, DMBOK 2.0), and integrating with leading enterprise platforms.

2. Stakeholder Identification

2.1 Primary Stakeholders

Stakeholder Group	Role in Project	Interest/Influence
Project Sponsors	Funding, strategic direction, high-level decisions	High
Product Owners	Requirements definition, prioritization	High
Business Analysts	Requirements elicitation, standards compliance	High
Solution Architects	System design, technology selection	High
Developers	Implementation, code quality, integration	High
Test & QA Teams	Testing, validation, compliance	Medium
Enterprise IT (Ops/Security)	Deployment, security, compliance, SSO integration	High
End Users (Project Teams)	Day-to-day use, feedback, adoption	Medium/High
Enterprise Integration Owners	Confluence, SharePoint, Adobe, VCS, API integration	High

2.2 Secondary Stakeholders

Stakeholder Group	Role/Interest
External Auditors	Regulatory compliance reviews (GDPR, SOX)
Open Source Community	Contributions, feedback, bug reports
Industry Standards Bodies	Alignment, certification
Fortune 500 Beta Partners	Pilot testing, enterprise feedback
Support & Training Teams	End-user enablement, documentation
Vendors (AI Providers)	API support, reliability, escalation

3. Stakeholder Analysis

Stakeholder	Engagement Needs	Communication Preferences	Key Concerns
Sponsors	Progress, ROI, risk	Executive reports, presentations	Timely delivery, compliance
Product Owners	Feature delivery, backlog management	Agile ceremonies, dashboards	Roadmap alignment, priorities
Business Analysts	Requirements traceability, standards	Workshops, documentation	BABOK/PMBOK compliance
Developers/Architects	Technical specs, APIs,	GitHub, Slack, documentation	Integration, code quality

Stakeholder	Engagement Needs	Communication Preferences	Key Concerns
	CI/CD		
QA/Testing	Test cases, bug tracking	Jira, test reports	Coverage, regression risks
End Users	Training, support, feedback	Training sessions, wiki, email	Usability, reliability
IT/Security	Deployment, SSO, compliance	Change requests, meetings	Security, data privacy
Integration Owners	API, plugin compatibility	API docs, integration guides	Stability, extensibility

4. Stakeholder Engagement Approach

4.1 Engagement Principles

- **Transparency:** Regular, open communication of progress, risks, and decisions.
- **Inclusion:** Involve all relevant stakeholder groups in requirements, design, and validation.
- **Responsiveness:** Timely response to feedback, issues, and change requests.
- **Compliance:** Adherence to regulatory (GDPR, SOX, PCI DSS) and industry standards (BABOK, PMBOK, DMBOK).

4.2 Engagement Activities by Phase

Project Phase	Engagement Activities	Key Stakeholders
Initiation	Stakeholder mapping, kickoff meetings, requirements workshops	Sponsors, Product Owners, Analysts
Planning	Roadmap reviews, standards mapping sessions, architecture walkthroughs	Architects, IT, Product Owners
Execution	Sprint reviews, demos, integration testing, technical documentation updates	Devs, QA, Integration Owners
Validation	User Acceptance Testing (UAT), compliance audits, feedback sessions	End Users, QA, Auditors
Deployment	Release planning, training, support handover, change management	IT, Training, Support Teams
Operation	Ongoing support, community engagement, feedback loops, roadmap updates	All groups

5. Communication Plan

Channel	Purpose	Audience	Frequency
Project Meetings	Status, issues, planning	Core team, key stakeholders	Weekly
Sprint Demos	Progress showcase,	Product Owners, End Users	Bi-weekly

Channel	Purpose	Audience	Frequency
	feature validation		
Executive Reports	Strategic updates, risks, ROI	Sponsors, Executives	Monthly
Documentation Portal (Wiki/GitHub)	Specs, guides, knowledge base	All stakeholders	Continuous
Issue Tracker (GitHub/Jira)	Bug/feature tracking, feedback	Dev/QA/Product Owners	Continuous
Integration Workshops	Technical onboarding, troubleshooting	Integration Owners, Architects	As needed
Training Sessions	User enablement, best practices	End Users, Support Teams	Pre-release/Quarterly
Community Forums	Open feedback, Q&A	Open source community	Continuous

6. Stakeholder Engagement Tools

- **Collaboration Platforms:** Atlassian Confluence, Microsoft SharePoint, Slack/MS Teams
- **Project Management:** Jira, Azure DevOps
- **Version Control:** GitHub (Enterprise), GitLab
- **Documentation:** GitHub Wiki, Markdown templates, OpenAPI Specs
- **Integration Channels:** REST API, CLI, Admin Web Interface
- **Feedback Mechanisms:** Surveys, GitHub Issues, direct email

- **Compliance Management:** Audit logs, regulatory checklists

7. Engagement Schedule and Milestones

Milestone	Engagement Actions	Date/Period
Project Kickoff	Stakeholder introduction, expectations alignment	July 2025, Week 1
BABOK/PMBOK Framework Launch	Analyst/BA training, feedback collection	July 2025, Week 3
Confluence/SharePoint Integration	Integration workshops, admin onboarding	August 2025
DMBOK Framework Beta	Data team pilot, compliance reviews	Sep-Oct 2025
Docker/Kubernetes Rollout	IT/DevOps enablement, security validation	Q2 2025
SSO/Enterprise Integration	IT, Security, user provisioning updates	Q3 2025

8. Unique Project Engagement Considerations

- **Multi-Framework Standards:** Tailored engagement for BABOK, PMBOK, DMBOK audiences, with specialist workshops.
- **Enterprise Integration:** Deep collaboration with IT/integration owners for seamless deployment to Confluence, SharePoint, Adobe, and VCS platforms.
- **Security & Compliance:** Continuous involvement of security, compliance, and audit stakeholders due to regulatory and Fortune 500 requirements.
- **Open Source Community:** Structured process for external feedback and contributions, including code review, documentation updates, and feature proposals.

- **AI Provider Coordination:** Vendor engagement to ensure reliable, ethical AI usage and rapid incident escalation.
-

9. Monitoring & Review

- **Stakeholder Satisfaction Surveys:** Quarterly, to assess engagement effectiveness.
 - **Engagement Metrics:** Meeting attendance, contribution rates, feedback turnaround.
 - **Issue Resolution Tracking:** SLA-based response monitoring for stakeholder queries/issues.
 - **Plan Review:** Annual review or upon major project milestone/roadmap change.
-

10. Practical Guidance for Stakeholder Engagement

- **Maintain up-to-date stakeholder contact and responsibility matrix.**
 - **Use shared documentation and dashboards for transparent progress tracking.**
 - **Schedule regular touchpoints with high-influence stakeholders (e.g., sponsors, product owners).**
 - **Solicit and act on feedback early and often, especially for standards compliance and integration points.**
 - **Leverage enterprise training and knowledge transfer to maximize adoption.**
 - **Document and communicate any changes in scope, timelines, or priorities promptly.**
-

11. Appendix: Stakeholder Register (Template)

Name	Organization/Dept	Role	Contact	Influence	Engagement Approach

Populate and maintain this register as a living document.
