

Stacey Dillon-Nicholls is a dynamic leader in the energy sector with over 28 years of experience driving transformational change across oil, gas, and renewable projects exceeding \$2 billion. As Senior Project Manager at BP America, she spearheads a global initiative to embed quality further across the global portfolio, reducing quality defects and improving capital productivity. Previously, as Head of Infrastructure – US Hydrogen & CCS, she led the infrastructure arm of pioneering projects in hydrogen and carbon capture and storage. As Port & Local Infrastructure Project Manager for Empire Offshore Wind, she led the initial upgrade of the South Brooklyn Marine Terminal.

Her early career included critical roles with industry giants such as Bechtel, KBR, and Atkins Global, where she honed her expertise in project management, risk mitigation, structural engineering and cross-cultural team leadership. Her leadership on landmark projects, including the Empire Offshore Wind initiative and other upstream oil and gas projects demonstrates her exceptional ability to manage complex, high-stakes project development.

A respected member of the professional community, Stacey holds the Project Management Professional (PMP) certification, issued by Project Management Institute. She has served on various Boards including as Vice Chair. She's been a speaker at several renewable, oil, gas and energy events, sharing her expertise on innovative project delivery and energy transition challenges, including the prestigious Women's Global Leadership Conference.

Stacey earned her Bachelor of Science in Civil Engineering from the University of the West Indies and her Master of Science in Civil Engineering from the Georgia Institute of Technology, both with summa cum laude honors. Her numerous accolades, including a Fulbright Scholarship, Young Woman of the Year awarded by an NGO and multiple academic awards, underscore her lifelong commitment to excellence and leadership in engineering.
