Description: BABOK: Requirements Life Cycle Management document

Requirements Life Cycle Management

This document describes the processes and tasks for managing requirements throughout their life cycle, as defined in BABOK.

Purpose

- Define how requirements are traced, maintained, prioritized, and approved.
- Ensure requirements are aligned with business objectives and stakeholder needs.

Key Sections

- Trace Requirements
- Maintain Requirements
- Prioritize Requirements
- Assess Requirements Changes
- Approve Requirements

Approach

Describe the approach for each of the above sections, referencing project context as needed.

This document is generated based on the project context and BABOK best practices.
